

How to Grow a Potato Vine

09/20/2020

1) Push four toothpicks into a red potato to make an "X".

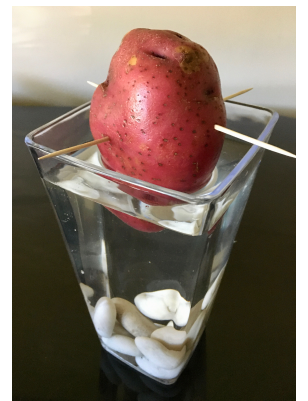

2) Use the toothpicks to rest the potato on the rim of a vase with some of the potato's "eyes" on top.

3) Fill the vase with enough water to cover the bottom part of the potato

4) Put the vase in a sunny spot near a window

5) Add water when needed. Change the water when it looks cloudy.

6) Be patient, and keep watching to see if the potato grows roots, leaves, and a vine.
